

REDUCE, REUSE & RECYCLE TIPS

#BeeBowl

Help our pollinator pals stay hydrated by creating a safe space for them to drink

This is a great way to support wildlife!

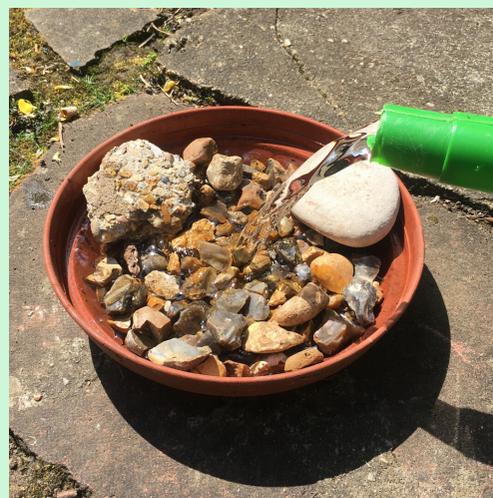

A flower pot dish makes the perfect bee bowl, but you can use a similar dish of any kind.

Collect some stones and pebbles in the dish. These will add weight to your bee bowl. Insects will land on these as they come to drink.

Pour in water, leaving some stones just above the water level. It's best if you can use rainwater!

Alternatively, leave the bowl to collect falling rainwater.

Find a sunny spot to place your bee bowl. Bees will love it even more if it's near flowers!

Enjoy the buzz of bees & remember to refill when the bowl is empty.
