

REDUCE, REUSE & RECYCLE TIPS

#ToiletRollTree

Create a colourful crafted forest by turning a toilet roll tube into a tremendous tree!

Here's what you will need

- toilet roll tube
- piece of card
- pair of scissors
- glue stick
- colouring pens
- colourful cuttings from newspapers and magazines

Draw the outline of a bushy tree on the card. Then, cut two incisions on opposite sides of the toilet roll tube.

Decorate your tree and its trunk with your magazine cuttings and colouring pens.

Cut along the outline of your tree to make the two parts.

Slot the top of your tree into the two slits on your trunk.

Find a place to display your miniature toilet roll tree. Make some more and create a forest!
